**Holistic Heart Centers**

## You take care of patients. We take care of business.

Ready to take your practice to the next level? Engaging with the Holistic Heart Centers provides access to unparalleled resources for concierge practice transformation. We provide Precision Practice Business solution, a comprehensive suite of services to enable concierge cardiology programs in your practice or organization. Our signature program, Fit in Your GENES, is a proprietary precision cardiovascular offering based on the principles of integrative and functional medicine. The services are provided under Management Services Agreement, and we work closely with you to design a custom-fit for your practice.

## Why Holistic Heart Centers is the right fit for your practice

We take unnecessary work off your plate so you can focus on providing quality care to your patients.

For specialty physicians with procedural scope, transition to a concierge model presents reputational and financial risks. We provide a proven and effective system to enable this transition while preserving practice integrity, enhancing physician reputation, and mitigating risks. No need to invest hundreds of hours and thousands of dollars for courses and coaching, and then struggle to pull it together through trial and error. We bring a complete solution to you. Our model worked successfully in the private and hospital-based settings.

- Financial autonomy and security

**Concierge practice model allows practices to become independent of insurance reimbursements, enabling practice autonomy and sustainability. Patients choose you and your practice based on the value of your services, not defined by the insurance networks.**
- Data-drive outcomes

**Our proprietary tools collect relevant data to enable KPIs and efficacy outcomes for your concierge integrative cardiology programs.**
- Efficient workflow and training

**We provide physician training and integration of the licensed protocols. We train you and your staff to enable rapid implementation.**
- Purpose-built technology

**We provide access to a cloud-based EMR pre-loaded with templates and resources to run your programs. Our digital biomarkers, lab vendors and protocols are integrated in the EMR.**
- Human-centric patient support

**Our dedicated patient concierge facilitates patient triage, onboarding, and care coordination helping you and your staff focus on providing clinical care.**

- Curated partnerships and thought leadership

**We partner with certified laboratory providers and provide branded supplement protocols, enabling you to benefit from additional revenue streams. We actively market your practice to promote your thought leadership.**

## We are on your team

We partner with practices to create the model that fits your practice bandwidth. If you do not have team members who can provide program services, we bring our team to you to provide your patients with nutritional and behavioral advice, and program guidance.

## Practice transformation FAQs

1. What is your practice location (urban, suburban, rural)?
2. What is your practice set-up (private, integrated, academic)?
3. What cardiology-specific testing services are provided?
4. How many full time equivalents (FTEs) are involved in clinical services?
5. How many new and established patient visits occur annually?
6. Do you employ any non-physician staff (RN, PA, MA, RD, health coach)?
7. Do you have a practice website?
